EXPERIENCE

Lawgix, Austin, TX — *Software Developer*

September 2016 - Present

I currently work with React and Redux on the frontend of the new platform while also working with Ruby on Rails and Postgres on the backend of the old platform. Use Git to commit and track code across multiple repositories. Push and deploy completed code to staging and production environments with AWS, Heroku, and Codeship. Write tests using Mocha, Chai, Sinon, and Enzyme to prove commitment to optimized code.

Conversion Fanatics, Ninbitsu, Jackrabbit Mobile *Freelance Software Developer*

February 2016 - September 2016

Conversion Fanatics - Rapidly rebuilt sign up forms for client. Used Bootstrap for styling, jQuery plugins for different functionalities, and HTML5 geolocation api. After form was updated I would run A/B tests in Optimizely.

Ninbitsu - Built a social network for youth sport coaches called Leagedin. Used React to build form components in the Rails asset pipeline utilizing the react-rails gem.

Jackrabbit Mobile - Setup Rails API with Angular on the Front End. Used CSS Grid System with Angular Material and Bootstrap.

Blue Goji, Austin, TX — *HTML Email Developer*

February 2015 - June 2015

As a HTML Email Developer I created dynamic and responsive email layouts while ensuring email messaging was accessible and optimized for delivery across all email clients on both web and mobile.

Frost Bank, Austin, TX — *Employee Benefit Broker*

May 2013 - October 2014

As an Employee Benefits Broker, I helped companies navigate the complexities of group insurance and health care reform to deliver quality risk management and insurance programs for their employees.

SKILLS

HTML5, CSS3, HAML, Sass, JavaScript/ES6, Bootstrap, Semantic UI, AJAX, React, Redux, Ruby on Rails, SQL, Postgres, Git, Github, Mocha, Chai, Enzyme, Heroku, AWS, Codeship, Webpack

Critical thinking

Clear communication

Coachable
